DETAILED ACTION

Allowable Subject Matter

Claims 1-14 are allowed.

Reasons for Allowance

Claim 1 is allowable since there is no prior art of record that teaches a liquid crystal device comprising:

- a liquid crystal layer including negative dielectric anisotropy liquid crystal disposed between the array substrate and the counter substrate; and
- stripe alignment control electrodes disposed between the counter substrate and the liquid crystal layer, each alignment control electrode extending along the boundaries of the pixel electrodes in plan view.

Claims 2-14 are allowed since they depend on the allowed claim 1.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Koma (US 5608556 A) discloses a liquid crystal display having orientation control electrodes on an interlayer insulation film 21 for controlling liquid crystal orientation.

Koike et al. (US 6040885 A) disclose a liquid crystal display comprising alignment control electrodes 34 under display electrodes 32.

Suzuki et al. (US 6256082 B1) disclose a liquid crystal display with a liquid crystal orientation-controlling electrode at center of pixel electrode and processes for manufacturing and driving thereof.
